SCRIPTS/UI: JavaScript, BootStrap, Axios
DATABASE: postgreSQL, SQLite
WEB DEBUG TOOLS: Chrome Developer Tools
VERSIONING AND OTHER TOOLS: Gitbash, Github
DEPLOYMENT TOOLS: Heroku, Netlify

EMPLOYMENT

IBEW LOCAL 477
1855 S Business Center Ct, San Bernardino, CA 92408
Electrician
July 2012 to Current

- Read and understood complex blueprints to properly install a variety of electrical systems.
- Investigated and problem solved for faulty electrical designs.
- Worked and communicated with a variety of different teams, often times working with other trades.
- Planned out and built custom electrical designs to provide the most efficient pathways for electrical conduit.
- Often times had to pick up semi-completed projects, which entailed figuring what the previous electrician had planned and completing said project to completion.

PROJECTS

RV NAV
Aug. 2019 to Sept. 2019

App designed to provide users the ability to create safe routes for RVs and trailers by allowing them upload personalized information for their vehicles.

Built using - React, Redux, axios, json, CSS, NodeJS, express, knex

- Was in charge of populating Vehicle information forms with correct information according to user input. Used the Redux store to manage the state between the different forms.

- Styled the landing and authentication pages to be full responsive. Used vanilla CSS while utilizing flexbox to help manage the elements being styled.

Frontend - https://github.com/labs15-rv-life/frontend, Backend - https://github.com/labs15-rv-life/backend

VOLUNTEERING

LAMBDA SCHOOL · Meetup Coordinator
Mar. 2019 to Current

I plan and coordinate student meet ups in the Inland-Empire of southern California.
